**RE: ARCHIVING PROCEDURE FOR DAILY NEWSCASTS RECORDED IN
"WEEKLY SUMMARY REPORTS" PLACED IN WLUK-TV'S FCC PUBLIC
FILE, *QUARTERLY PROGRAMS AND ISSUES REPORTS*.**

Throughout the day, video is edited for "on-air" presentation, and then is sent to a server in the Newsroom.

Each Newscast is titled on the server and the video used "on-air" is compiled onto an archive tape.

A log is created for each archive tape. This log includes information relating to the show, video title, and length of each piece.

The rundown for each newscast is opened and the following information is listed: archive tape number, length of video, format, (i.e. package, vo, vob, vosot), and a short description of segment content.

This procedure must be done daily and in a timely manner to insure that video is retained and available for future use.

It is my responsibility to archive all information, and print out a weekly log to be placed in the FCC Programs and Issues Report.
